Arm User Enablement

Engage!

Facilitate Arm Exploration

- Build confidence in and excitement for Arm tech

- Engage interested parties to further partner success

- Elucidate performance and facilitate optimization

- Participate in prominent displays of Arm HPC technology
  - Catalyst, Isambard, Post-K, Astra, etc.
  - Triage problems to partners
  - Facilitate impactful results and encourage new users to join in

- Public demonstrations of technical expertise
  - Create venues for partners and users to discuss their results
  - Demonstrate and document best practices
  - Build and maintain a reputation as technical experts, not sales/marketing

- Advise benchmarking and performance exploration efforts
  - Recommend optimizations and system configurations
  - Wireframe performance expectations

arm

Who you gonna call?

Arm Professional Services!

- Application performance engineering!
  - Compiler not vectorizing?
  - Performance not what it should be?

- New system tuning!
  - Do you have the right SMT mode on your ThunderX2?
  - Does your InfiniBand need tweaking?

- Hackathons and tutorials!
  - Does a team need a mentor at your hackathon?
  - Looking for a jumpstart with Arm HPC?
