- + [Arm Functional Safety Partnership Program](#)

The Arm Functional Safety Partnership Program brings together partners in the vast Arm ecosystem with a special focus on functional safety related services and products.

With our ecosystem of thousands of partners, it is sometimes difficult for customers to find the ones that have the right experience in the field of functional safety. This program will make that quest easier and the time to market shorter.

Our Training Services category is for partners providing functional safety related training services specializing in “functional safety on Arm”. For example:

- + How Arm safety packages can be used
- + What are the safety features of Arm Safety Ready IP
- + How the results of the safety analysis for the IP should be integrated at system level

If you would like to become a part of the program in our Training Services category, register your interest [here](#). As a pre-requisite of joining the program, evidence to showcase compliance to the below quality standards must be provided during the registration process.

Quality Standards

We have defined a set of Quality Standards in Schedule 1 of the Arm Functional Safety Partner Training Services agreement (“Agreement”) that our partners need to prove to be part of this program.

The Quality Standards set by Arm include but are not limited to the following requirements:

Requirements	Comments (Please explain how your organization meets these requirements, also share evidence (certificates/links) as applicable)
Partner has received official certification across any of the industry safety standards	<E.g. Endorsement/testimonial from customers, links to certificates in customer website using your product to ASPICE, IEC 61508, ISO 26262 or other relevant safety standards>

Partner has received positive testimonials from a selection of customers confirming satisfactory performance of services received	<E.g. training feedback forms>
Partner's key staff have achieved a professional functional safety qualification as realized by one of the Arm recognized assessors	<CVs of functional safety experts, certificates to evidence functional safety expertise of key personnel>
Partner's facilities, laboratory and equipment used in providing services are satisfactory	<Evidence that you have adequate facilities to deliver training services online and offline e.g. PCs and telephones, mobile phones, online platform etc>
Partner demonstrates high levels of information security and management	<Provide evidence of information security certification if available or examples of information security processes in place>

If you have any queries about the quality standards or Training Services category, please contact safety.partners@arm.com
