

## Arm's Public Disclosure Statement Pursuant to California AB 1305

Arm Holdings plc and its subsidiaries ("Arm") provides the following disclosure statement in accordance with California AB 1305, the Voluntary Carbon Market Disclosures Act ("VCMDA").

### Climate-related Claims

Arm is disclosing the following information in support of Arm's climate-related claims (AB 1305, section 44475.2).

#### Arm's Net Zero<sup>1</sup> Commitment:

We have committed to cut our absolute greenhouse gas emissions ("GHG emissions") by 50 percent from an FYE20 baseline across all emissions sources (scopes 1, 2, and the six categories of scope 3 relevant to Arm) by FYE30. This is in line with a 1.5°C climate pathway<sup>2</sup> and the Paris Agreement.

To support the delivery of our 2030 commitment, we have set targets to:

- Continue to procure 100% renewable electricity, after achieving this for the first time in FYE23.
- Achieve a 7% absolute reduction in emissions from business travel by FYE30 against a FYE20 baseline.
- Achieve a 42% absolute reduction in our supply chain emissions by FYE30 against a FYE20 baseline.

Information about our 2030 commitment and our latest progress for FYE24 is documented in the [Arm Sustainable Business report FYE24](#).

Arm's Scope 1 and Scope 2 emissions (location- and market- based), are annually verified by a third-party.

### Carbon Offsets

Arm is disclosing the following information in support of Arm's voluntary carbon markets disclosures (AB 1305, section 44475.1).

Arm purchases voluntary carbon offsets. Arm does not rely on offsets to achieve our 2030 emissions reduction goals, but we invest in carbon offset projects as part of our overall sustainability strategy.

Information about our carbon offset strategy and partnership is documented in the [Arm Sustainable](#)

---

<sup>1</sup> As per the note in the Arm Sustainable Business report FYE24: *Arm's definition of 'Net Zero Commitment' predates the definition provided by the Science Based Targets initiative (SBTi) by 18 months and therefore does not align with SBTi conventions. We recognize this misalignment but continue to use this term as it was originally intended [by Arm], and with transparency, as we deliver our commitment. We refer to "net zero" as a commitment to limit our emissions to align with a collective 1.5°C emissions reduction pathway as set forth in the Paris Agreement and by the IPCC.*

<sup>2</sup> Aligned with the IPCC's (Intergovernmental Panel on Climate Change) 1.5°C pathway requiring a 50% GHG emissions reduction by 2030

[Business report FYE24.](#)

In FYE23 and FYE24 we purchased the following offsets. We do not include offsets in our GHG emissions footprint calculations.

Project name	Central Kalimantan Peatlands
Seller	Pachama Inc
Registry and project ID	VERRA VCS674
Carbon removal or avoided emissions	Avoided emissions
Methodology	VCS Methodology VM0004
Country	Borneo, Indonesia
Independent third party	SCS Global Services
